

# Art and Design: Summer work!

## Show your stuff guys!

Art and Design A-Level:

Drawings, paintings, prints or photographs of a range of subjects. Create your own full sketchbook which will assist you in your course. Remember; the more images you have to work with the greater variety of ideas you can play with when exploring techniques on our return.

We urge you to specifically select subjects to document that fall into the following categories: Still life (which may include natural forms and human objects), Landscape (location work that can also include interiors as well as outside spaces) & Portraiture (people, faces, full body and close up shots).

Show in your sketchbook that you are recording and investigating using a range of media. Make studies of the same subject from multiple angles and from different points of view. Remember to record where, when and what.

Your sketchbook can be any size that you are comfortable having with you at all times, studies can range from 5 minute continuous line drawings to long studies of a period of days or hours.

You will present these books on the first lesson when you arrive in September, I cant wait to see what you guys come up with!
